The Art of Flexibility

We have been processing and refining steel wire for more than 100 years

We use our knowledge and our competence to develop and manufacture products suitable for the markets of the future

We are a global technology leader for helical compression springs with inconstant wires

We are recognized as global expert for rebound springs by damper producers

## Our mission statement

### Culture

- We are creative and innovative – as a matter of course
- We are a competent, motivated and customer-oriented team
- We are always conscious about the consequences of our actions
- We live a fair, determined, disciplined and sustainable corporate culture
- We have reliable customers and suppliers as partners on our road to success
- We are known as successful company and fair employer with good working conditions in our region

### Technology

- We are an indispensable partner for our customers
- We advise competently about the use of springs

### Production

- We produce where our customers' requirements for price, quality and service are fully met

### Quality

- We fulfill even highest quality requirements of our customers
- We are proud of the quality of both our service and cooperation
- We act environment-friendly
